LAW MONOPOLY.

With what a sense of relief must not the members of our Legislature behold the near termination of their senatorial labors! Theirs has been no very flowery path. The position is not generally so. It is no very agreeable thing, at any time, for an ambitious of parliamentary honors to have his official actions treated like shuttlecocks upon the battlements of public opinion. Still less pleasant must it be to any individual, when there is a consciousness that the political conduct which the public are wont to treat so unceremoniously, has, in his case, been not altogether what it should be. It is not under such circumstances as these that one can meet his constituents with confidence, and ask their suffrages for re-election. But disagreeable though the picture may be, it will, we conceive, to some at least of the members of our Assembly. Both they and the Legislative Council—our Star Chamber—have been guilty of too many objectionable acts of both commission and omission, for the public to rest satisfied with them. The next election will see the trial of their political conduct. The abuses and wants under which the country labors will then be brought to light in their accumulated form, and it is to be hoped that the right stamp of men to put things in proper shape will be chosen for the next Parliament. Among the changes required are some which more or less affect both colonies, and it may happen that British Columbia, without a representative body as part of the governing power, may take the lead in the path of reform.

Our Legislature has had an opportunity during this session which is now passing away, to inaugurate more liberal principles in relation to the law regulating the legal profession in this colony. The disgraceful state of things existing here which throws the practice of the law into the hands of men from one portion only of Her Majesty's dominions to the exclusion of qualified practitioners from the rest of the empire, was brought prominently before the notice of the Committee on the Esquimaux Railway Bill. The evil of our present system was then clearly perceived by the members of both Houses. The remedy was suggested, and had our legislators been actuated solely by a desire of serving the interests of the public instead of those of a class they would have had no difficulty in applying it. As it was, however, they did nothing to do away with the monopoly exercised by Barristers hailing from England, Ireland, and Scotland. The upper House did worse. Upon the paltry pretense of want of compliance with formalities a majority of that august body threw out a Bill, brought by a talented young Canadian Barrister, to enable him to practice his profession in this colony. How men can do such an act and say they legislate for the public good is more than we can conceive. A doctor or civil engineer may practice his calling here without hindrance, while a lawyer who has had the misfortune to have devoted long years to the study of a difficult profession in one of our colonies is under our Model Legislature deprived of the fruits of his toil. The public, however, will not stand this any longer. They will insist upon fair play being shown to every British subject, no matter from what part of our mighty Empire he may come.

As to British Columbia, the same state of things exists, but the effects, so far as the public are concerned, are, if anything, worse. The people of that extensive colony are obliged to choose between some three or four lawyers when they have need of legal assistance, or else send down to Victoria for it. The consequence is, that a wealthy individual may, without difficulty, subsidize the whole bar. How can there be any security for the honesty of the profession under such circumstances? When competition is excluded, the monopolists will neither feel the necessity of acting fairly towards their clients nor of maintaining a high intellectual standing in their calling. The public of British Columbia are well aware of this. They know perfectly well how necessary it is for their safety and convenience, that the present restricted boundaries of the legal profession should be enlarged. Knowing this, they have very properly petitioned His Excellency to issue such a proclamation as may be necessary to legalize the admission of duly qualified colonial barristers in general, and Mr. Walkem, in particular. The Governor is, we understand, favorable to such a measure, and if he will only follow the dictates of his own good sense in the matter, and disregard the opinions of interested advisers, he will grant the prayer of the petition we have just alluded to. By doing so, he will confer a benefit upon the people of that colony, and do an act of justice to those who are now so wrongfully deprived of the means of earning their living by their profession. This Colony and British Columbia both contain a very large proportion of men from the colonies, they are to be found in nearly every walk of life, and are just the kind of people we need to reduce these countries to the condition of more advanced nations. We, therefore, invite them to our shores, but in doing so we must place them upon an equal footing with British subjects from England. The same legal protects both, and ought to give them equal rights. The Colonial Barrister should be placed in no worse position in this respect than his brother of the medical profession. The slightest regard for the feelings of our large colonial population would naturally dictate this course of action, apart from the benefit the public would derive from leaving a larger field of qualified men to choose from.

TENDERS

ARE REQUIRED FOR BORING AN ARTESIAN WELL, on the premises of the Victoria Gas Company, at the Company's office at the Works.

NOTICE.

Victoria, Nov. 2

**THE BRITISH COLONIST**  
Friday Morning, Feb. 27, 1893.  
**AUCTION SALES.**  
ALFRED J. VECCHI will sell, at 11 o'clock,  
at Mr. Copland's Brick Store, Langley street,  
Quana, Dry Goods, Shirts, China Ware, Electro  
Plated Ware, Jewellery, etc.  
P. M. BACKUS will sell, at 11 o'clock, a m.  
at Anderson, Ale, Glass, Apples, Brandy, Butter,  
Crockery and Glassware, Hardware, etc.  
**Selling Liquor to Indians.**  
Henry Cosser appeared before the Police  
Magistrate yesterday morning to answer the  
charge of selling a case of liquor to an  
Indian. Mr. Courtney appeared for the de-  
fence. At the request of the Attorney for  
the defendant all the witnesses were required  
to leave the Court. Police Constable Reid  
stated that he was returning to barracks  
on Tuesday evening in company with a  
brother officer, when they were accosted by  
an Indian named Joe, who told them that he  
had just seen some liquor sold to a native  
Indian, and could show them where. Witness  
asked him if he could purchase some. The  
Indian answered in the affirmative. Joe  
informed them that the price of a case of  
whisky would be \$5.50, which they gave  
him. The Indian then said that he would  
get a relation to go for the liquor instead of  
himself, and obtained the services of a little  
boy who brought from a house near the  
barracks. The officers then followed the two  
Indians to Market Alley, when the latter  
returned to inform them that the liquor had  
been purchased for \$6. The officers had not  
the money about them, but the little boy  
said he would make it up. The officers then  
saw the boy enter a liquor saloon, situate  
at the junction of the two streets, and  
obtain the liquor. The officers then followed  
him to the door; witness saw the boy place  
the money on the counter, when the  
defendant took it up, and gave to the boy a  
case. On the boy taking the case, the police-  
men took him to the case of liquor, and  
then went in and charged the defendant  
with the offence. The defendant denied the  
offence, but said that he had sold some to a  
Chinaman. There were two men sitting in the  
room and one of them remarked that the  
liquor had been sold to a white man with  
black whiskers. The witness then followed  
him, and his comrade had looked through  
painted, but a space about the size of a man's  
hand was large so that they could see all that  
occurred inside.  
Witness further stated that when he went  
to fetch the Indian boy for the purpose of  
giving evidence in court, he was blackguarded  
by a female who was sitting at the bar, and  
that the woman also, in the presence of another  
person, told the boy to say that the police had  
promised to give him \$10 for his services.  
The witness was subjected to a severe cross-  
examination by the defence, in the course of  
which he denied having pre-arranged any trap  
for the defendant. He stated that he had  
neither offered nor promised remuneration to  
either of the Indians, and that the man who  
had given him the information was regularly  
supplied with liquor there. When he went to  
execute the warrant on Wednesday, he had  
seen a number of Indians drunk at the spot.  
The matter was allowed to go to the jury.  
The defendant said very excitedly that  
he did not care what the papers said. Let  
him do his own duty without referring to self-  
constituted authorities. He wished to have  
respectable men in the force, who would  
attend to their duty, &c.  
Officer Woodcock was then called, who  
substantiated the evidence of the previous  
witness in almost every particular. The only  
important difference being that he at first  
stated that the defendant, when charged with  
the offence, said that he had sold it to a  
white man, though afterwards he was un-  
certain whether the defendant or another  
person present had asserted that it was a  
Chinaman.  
The little Indian boy was examined. In  
his first statement he fully corroborated the  
testimony of the officers; afterwards, how-  
ever, he told two totally distinct versions.  
Mr. Pemberton, therefore, declined to receive  
his evidence in the case. In the course of  
his statement he mentioned that the other  
Indian had promised that the policeman  
would give him \$10 for his services.  
In compliance with the request of officer  
Redgrave, the magistrate asked the boy  
whether any one had told him to say that he  
had been offered money by the police. He  
answered that Mrs. Keenan had told him; and  
that she was very angry with the policeman when  
he came for him.  
Four witnesses named Robert Deater, Wm.  
Wilson, John Maguire, and Henry Deater  
were called for the defence, who swore posi-  
tively that no Indian came into the house  
previous to the policeman making his arrest.  
At a white man came in about five  
minutes before and purchased a case of  
liquor. Under cross-examination, their de-  
scription of this party, however, differed  
very materially.  
The case was remanded for one day.

**News from Cariboo!**  
**DATES TO FEBRUARY THE FIRST.**  
**Great Excitement at the Mines!!**  
**\$30,000 in Gold Dust brought**  
**Down by Barnard's Ex-**  
**press from Williams**  
**Creek Alone!**  
**\$10,000 in PRIVATE HANDS!**  
**Large Amount on the Way!**  
By Dietz & Nelson's Express we have the  
following highly important intelligence from  
Williams Creek:  
Mr. Wm. Humphrey, of Barnard's Ex-  
press, left Richfield on the 1st of February,  
and reached Lytton in the extraordinary short  
time of nineteen days, being a few hours be-  
hind the express which was expected to be  
delivered to him in expressing at this season  
of the year.  
The weather on the creek continued mild,  
the snow being only two or three feet deep.  
All the working claims—John A. Cameron  
& Co.'s, Barker's, Black Jack, Canadian, and  
Hard, Curry & Co.'s had run sluices without  
intermission all winter, and all hands were  
fully employed, and the best of the season  
was reported to be the best time to work the  
claims of the season. The men employed  
have been working regularly eight  
hours a day, and have had as good health as  
that enjoyed during the summer months,  
proving that the climate is not nearly so bad  
as has been represented.  
During the holidays, at Christmas and  
New Year, money (or rather dust, for there  
is no coin to be had at Richfield) was freely  
spent by all, and enjoyment was indulged in  
to the utmost. The snow, however, was  
abundant, and the best time to work the  
claims of the season. The men employed  
have been working regularly eight  
hours a day, and have had as good health as  
that enjoyed during the summer months,  
proving that the climate is not nearly so bad  
as has been represented.  
In John A. Cameron & Co.'s claim about  
half a mile below Barker's, a very rich prospect  
has been struck, and an interest of  
\$10,000 has been advanced for \$8,000 cash  
down. The excitement occasioned by this  
prospect was the greatest perhaps ever wit-  
nessed upon the creek, and a large number of  
new claims were subsequently staked off for  
the purpose.  
The Canadian claim now bears away the  
palm for richness. It has been yielding  
nearly \$6,000 or \$600 ounces per day, with  
every prospect of a permanency.  
The men employed on the creek might  
as well have been working all winter on their  
claims—provided provisions had been suffi-  
ciently plentiful, and prices low enough to war-  
rant men in remaining. The retail price of all  
kinds of provisions has been very reasonable  
the whole season through, and not much  
likelihood of their being enhanced unless a  
rash of thoughtless men go up before the  
season fairly opens. The latest quotations  
have been: Flour, \$1.00; beef, 10c; pork,  
\$1.30; beans, \$1.00; sugar, \$1.15 to \$1.20;  
tea, \$2.50; coffee, \$1.30; tobacco, \$1.50.  
Stocks were large. At Richfield and the  
lower towns, however, were going up in all di-  
rections, and the accommodation will be much  
greater the coming season than was to be  
found last year.  
Mr. Cameron, of the Pioneer Hotel, Richfield,  
was making extensive preparations to meet the  
vast influx of visitors which were expected.  
The people on the creek were in excellent  
health and spirits, looking forward to the  
approaching season with the most sanguine  
anticipations of the mines yielding uni-  
formly. Mr. Cameron, whose wife died  
while he was on the creek, had completed pre-  
parations for the removal of her remains, and  
was to start on the 2d instant, and come  
down here direct. A large number of resi-  
dents on the creek were to follow the corpse  
in funeral procession, as far as Antler.  
The deceased, as well as her surviving husband,  
were held in the highest esteem by all who  
knew them, and the greatest regret was felt  
by the friends of Mr. Cameron for the loss he  
suffered in the death of a wife so young and  
faithful wife. Mr. and Mrs. Cameron came  
originally from Canada, and had she lived  
there is every probability they would have  
retained there again, with a fortune which  
they would have kept their comfortably. Mr.  
Cameron is a principal partner in the claim  
which has lately yielded so rich a prospect.

There was no scarcity of water in the creek,  
and no prospect of any, as the general expec-  
tation was that the snow would melt, and the  
water would be abundant. The water was  
supplied with provisions as easily and  
cheaply as in the summer months. The ef-  
fect of this upon the country will be most  
important, increasing, as it must do, to an  
amazing extent the yield of the mines. The  
supply of gold dust is abundant, and the  
whole year round. With an efficient ex-  
port established, our merchants and traders  
will not have to complain hereafter of the  
tightness of the circulating medium in the  
winter season.  
The snow was deep when Mr. Humphrey  
was crossing the Bald Mountain, and at  
Antler there was no work going on, and only  
two men at the town. A number of tobacco  
smokers, dealers, and other people, who had  
reached Antler by Swift River. The road to  
the Forks of Quesselle was not difficult to  
traverse. At this place Mr. Humphrey was  
joined by Mr. Harris, of the firm of Harris  
Brothers, of that place, who, coming  
down here, and arrived yesterday by the  
Eliza Anderson. Mr. Harris had 55 lbs.  
weight of gold, equal to \$11,000 on his own  
account, which he managed to bring safely  
to town. The stock of provisions at this  
place was very large, and prices were  
moderate, viz., flour, 35c; rice, 35c; bacon,  
75c; beans, 50c; sugar, 42c; sugar, 70c;  
tea, \$1.50; tobacco, \$3.00. Between the Forks  
of Quesselle and Beaver Lake, Messrs.  
Humphrey and Harris had about 100 men  
going up to Williams Creek, who had been  
spending the winter at the Beaver Lake.  
No doubt the exciting accounts which were  
brought down were too tempting to allow  
of any delay in starting. The men were in  
idleness any longer, and onward was the  
word. The small-pox had entirely dis-  
appeared at Beaver Lake, and the people  
there were all in good health. Very few men  
remained at Antler, the first of the winter  
made to go to the mines. From that to  
Williams' Lake there was very little snow,  
and the roads were in good order. At that  
place, the small-pox had abated, and the  
Indians who were attending to the small-pox  
were separated from their beloved com-  
pagnons, even in adversity. The officer could  
not, however, see the necessity of having so  
large a party under his care for the remainder  
of the evening, wisely advised the men to  
disperse to their homes, and look into Mr.  
Pemberton's reception room on Bastion street  
in the morning, and they would there meet  
with their friends of the previous night.  
With the exception of one, the party com-  
plained of no ailment, and the one who was  
suffered was directed; but there was one who  
is known as the Marquis C. of Antun, who  
would not be separated from his friend, and  
all the reminiscences of his countrymen as  
well as the officer of the detachment, and  
the war-hatched fellow to part from the  
valued allied companion. When his appeals  
were taken up were not successful, he actually  
took the policeman's arm, and in this way  
went along until he reached the hall, where  
he was obliged to leave. The next morning they  
were present at the levee which the magistrate  
has in the habit of holding daily for the con-  
venience of such gentlemen, and after a slight  
discussion the Frenchman was discharged.  
This exemplifies, as we have already stated,  
the feeling which obtains between our Eng-  
lish and French inhabitants, and although  
we should like to see it less obvious, we  
are glad to see some allusion made for  
such occasions when men will make discre-  
tion and prudence to one side for a time.

**ANGLO-FRENCH ALLIANCE.**—A circum-  
stance occurred a night or two since which  
illustrates in a most amusing yet striking  
degree, how cordial is the alliance between  
the English and French residents of Victoria.  
A party of Frenchmen and their friends were  
celebrating the anniversary of the revolution  
which overthrew the throne of Louis XVI. in  
a convivial manner, and amongst the  
number there happened to be a jovial  
Englishman who united with the rest in  
drinking to the sentiments which were pro-  
posed. The imported in the quietest manner,  
but a few of them, the jolly Englishman, of  
course, amongst the number, being desirous  
of exercising their vocal powers in some of  
the martial airs, which were heard in the  
streets of Paris when the rule of the citizen  
king was overthrown, took the rounds of the  
city, singing as they marched along. The  
police on the occasion went with the greatest  
forbearance, and several times requested the  
choirsters to discontinue their noisy and  
disorderly numbers of the inhabitants. Advice  
and remonstrance, however, were alike un-  
availing, and when the uproar could not be  
subdued to any longer, one of the party  
was arrested, and taken to the station, and  
John Bull himself. The Frenchmen could  
not stand to see their brother Englishman  
taken up alone, and they appealed to the  
officer to take them with him, and to allow  
them to be separated from their beloved com-  
pagnons, even in adversity. The officer could  
not, however, see the necessity of having so  
large a party under his care for the remainder  
of the evening, wisely advised the men to  
disperse to their homes, and look into Mr.  
Pemberton's reception room on Bastion street  
in the morning, and they would there meet  
with their friends of the previous night.  
With the exception of one, the party com-  
plained of no ailment, and the one who was  
suffered was directed; but there was one who  
is known as the Marquis C. of Antun, who  
would not be separated from his friend, and  
all the reminiscences of his countrymen as  
well as the officer of the detachment, and  
the war-hatched fellow to part from the  
valued allied companion. When his appeals  
were taken up were not successful, he actually  
took the policeman's arm, and in this way  
went along until he reached the hall, where  
he was obliged to leave. The next morning they  
were present at the levee which the magistrate  
has in the habit of holding daily for the con-  
venience of such gentlemen, and after a slight  
discussion the Frenchman was discharged.  
This exemplifies, as we have already stated,  
the feeling which obtains between our Eng-  
lish and French inhabitants, and although  
we should like to see it less obvious, we  
are glad to see some allusion made for  
such occasions when men will make discre-  
tion and prudence to one side for a time.

**ACADEMIC THEATRICALS.**—The third per-  
formance of the Amateur Dramatic Associa-  
tion will come off this evening, for the  
benefit of the Local Relief Fund. "Poor  
Pilkidney" and "All that glitters is not  
Gold" are comprised in the programme. A  
few good seats are yet disengaged.

**HOUSE OF ASSEMBLY.**  
THURSDAY, Feb. 28.  
House met at 5:15, p.m. Present.—The  
Speaker, and Messrs. Cocker, Cary, Burnaby,  
and Franklin.  
The Council amendments to the Act to  
declare the denominations of Stamps under  
the Stamp Act of 1862, in conformity to the  
altered currency, passed a final reading.  
Mr. Cary reported the result of a confer-  
ence with the Upper House, in respect to the  
amendments to the Victoria Incorporation  
Debitures Act, informing the House that the  
Council were determined to retain their alter-  
ations.  
Mr. Cary said that by passing the Act in  
its present form, they would have to depend  
upon the generosity of the City Council to  
discharge the obligation.  
Mr. Burnaby was quite opposed to the  
Act as it now stood, and only gave it his vote  
because he thought the public good required  
the guarantee to be given, and that nothing  
could be done at this late period of the  
session.  
Mr. Franklin believed that the Act, in its  
entirety, was purely designed to facilitate the  
working of the corporation, and much re-  
spected the Council's decision. The Council,  
The Act, as amended by the Council, then  
passed a first and final reading.  
Mr. Franklin gave notice that at the next  
meeting he would move that the Executive  
Council be authorized to make the first instal-  
ment, which had been voted among them all  
the season. The survivors have said tales to  
tell of the dreadful scourge which has  
wrought such fearful havoc among their  
friends. At Lillooet report says down to  
the Indian called "Saint Paul" came to Cran-  
Creek from Kamlopa, and relieved the In-  
dians at the former place of seven of their  
best horses, on pretence of curing them. The  
medicine administered by the "Saint" was a  
poisonous compound, and Mr. Ritchie asserts  
that every animal it was given to died. The  
Indians intend prosecuting the quack.  
George Harvey, the miner, and his two  
companions at Deep Creek, are going down to  
the coast, and are expected to be able to  
leave in a short time after the Ex-  
press was down to and including Lillooet,  
have nearly all been carried off by the epide-  
mic, which has been raging among them all  
the season. The survivors have said tales to  
tell of the dreadful scourge which has  
wrought such fearful havoc among their  
friends. At Lillooet report says down to

the season. The survivors have said tales to  
tell of the dreadful scourge which has  
wrought such fearful havoc among their  
friends. At Lillooet report says down to  
the Indian called "Saint Paul" came to Cran-  
Creek from Kamlopa, and relieved the In-  
dians at the former place of seven of their  
best horses, on pretence of curing them. The  
medicine administered by the "Saint" was a  
poisonous compound, and Mr. Ritchie asserts  
that every animal it was given to died. The  
Indians intend prosecuting the quack.  
George Harvey, the miner, and his two  
companions at Deep Creek, are going down to  
the coast, and are expected to be able to  
leave in a short time after the Ex-  
press was down to and including Lillooet,  
have nearly all been carried off by the epide-  
mic, which has been raging among them all  
the season. The survivors have said tales to
